

Right-to-left text rendering

Demonstrates Arabic contextual shaping (presentation forms + lam-alef ligatures) and Hebrew BiDi reordering, both using WriteLineRTL and WriteTextRTL.

1. Arabic — single words

kitab (book) —

bab (door) —

marhaba (hello) —

lam-alef ligature —

sentence —

2. Hebrew — single words

shalom (peace/hello) —

שלום

todah (thank you) —

תודה

Israel —

ישראל

sentence —

שלום עולם

3. Mixed RTL + numbers

Arabic numerals embedded in Arabic text

42

Hebrew with Latin brand name

הוא מנוע חיפוש

4. Multi-line word-wrapped Arabic (WriteTextRTL)

Shaping and BiDi reordering applied per line — word order preserved across breaks.

٥

Hebrew paragraph:

בְּרֵאשִׁית בָּרָא אֱלֹהִים אֶת הַשָּׁמַיִם וְאֶת הָאָרֶץ

5. RTL text inside a Frame

Frame with RTL content — right edge of content area used as anchor.

שלום עולם זהו טקסט עברי בתוך מסגרת

6. Side-by-side columns — LTR left, RTL right

English (LTR)

The quick brown fox jumps over the lazy dog.

Arabic (RTL)
